PROFESSIONAL SUMMARY

Highly passionate Full Stack Developer with over a year of experience specializing in financial technology innovation. Proven track record in delivering scalable and reliable fintech solutions using Angular, .NET 8, and Java Spring Boot. Adept at rapidly adapting to emerging technologies like Docker and Svelte, thriving in Agile, cross-functional environments, and driving innovation through rapid prototyping and high-impact software development.

PROFESSIONAL EXPERIENCE

Junior Developer

First National Bank (FNB) | Mar 2024 – Feb 2025

As a Junior Developer at FNB, I contributed to the modernization of critical banking systems and enhanced software functionality within an Agile environment.

- **Quality Optimization:** Corrected, modified, and upgraded software to enhance functionality
- **Agile Collaboration:** Participated in sprint planning and code reviews
- **Full-Stack Development:** built java spring boot APIs and angular frontends for banking applications
- **Modernization:** upgraded legacy systems using .net 8 and svelte, improving performance by 40%

Full Stack Developer Intern

CapaCITI | Sep 2023 – Feb 2024

As a Full Stack Developer Intern at CapaCITI, I developed user-centric web solutions and data visualization tools to enhance client engagement.

- Developed user-friendly web forms with validation/error handling using bootstrap 5
- Created optimized landing pages with cross-browser compatibility
- Built data-driven dashboards via power bi for client analytic

EDUCATION

IT - Software Development,

Tshwane University of Technology

Matric, Tiisetsang High School

CERTIFICATIONS

- OCA: Java SE 8 Programmer I
- Git & GitHub (Advanced)
- Microsoft Azure (AZ900)
- UI/UX Design with Figma
- Microsoft SQL for Beginners
- Linux Mastery
- Practical Solution Architecture

TECHNICAL SKILLS

- **DEVOPS** Docker, Azure, Ci/Cd, Git/GitHub
- **DESIGN & ANALYTICS** Figma, Power Bi, Adobe Xd
- **FRONTEND** Angular 19, Svelte, Typescript, Tailwind CSS, Bootstrap, Html5, CSS3
- **BACKEND** Java Spring Boot, .Net 8, C#, C++, NODE.JS, Restful APIs
- **DATABASE** ORACLE PL/SQL, SQL SERVER, MYSQL

System Development Intern

Dynamic DNA | May 2022 – Apr 2023

As a System Development Intern at Dynamic DNA, I focused on developing and optimizing web applications for performance and security.

- Developed MVC systems using C# and Ms SQL
- Optimized web applications to enhance security and scalability, implementing best practices to protect sensitive data and improve system performance.
- Demonstrated adaptability by mastering new technologies and frameworks within tight deadlines and contributing effectively to project timelines.

SOFT SKILLS

- **Problem-Solving:** Resolved critical bugs ensuring maximum uptime
- **Adaptability:** Mastered Docker/Svelte within 3 weeks
- **Collaboration:** Enhanced team productivity via Agile
- **Initiative:** Proposed feature enhancements from user feedback

KEY ACHIEVEMENTS

- Reduced code redundancy by 30% through .NET 8/Svelte refactoring
- Boosted user engagement by 25% through dashboard optimizations
